Full-Stack Developer

LinkedIn	Github	YouTube	Portfolio	Leetcode	X (Twitter)

SKILLS

- **Frontend & UI:** React.js, HTML5, CSS3, Tailwind CSS, Redux, Material UI, Framer Motion
- **Backend & Database:** Node.js, Express.js, MongoDB, PostgreSQL, Supabase, REST APIs
- **Languages:** JavaScript (ES6+), C, C++
- **Libraries & Tools:** Formik, Yup, Stitches, Git, GitHub, VS Code, Vite, Figma, Postman
- **Hosting & Cloud:** Netlify, Vercel, Render, Cloudinary

CERTIFICATES

- Udemy Certificate of Completion
- PostgreSQL Certification — CodingGita

SUMMARY

B.E. Computer Engineering student with hands-on experience in building and deploying modern web applications. Skilled in full-stack development using the MERN stack with a focus on creating efficient, scalable, and AI-integrated solutions. Actively participating in hackathons to solve complex challenges and continuously mastering advanced backend architectures.

PROJECTS

Nexus AI – Resume Optimizer Suite

- **Overview:** Developed an enterprise-grade AI Resume Optimizer that analyzes resumes and provides intelligent feedback to land more interviews.
- Implemented intelligent skill gap detection and tailored suggestions for profile improvement.
- Built a clean, responsive frontend using React and a robust backend with AI integrations.
- Deployed the full-stack application for seamless global accessibility.

Technologies: React.js, AI, Tailwind CSS, Node.js

Links: Live | Github | YouTube | API Docs

- Node.js Certification — CodingGita
- Responsive Web Design — FreeCodeCamp
- Problem Solving (Basic) — HackerRank
- Doppelganger — OpenPools (Hackathon)
- ArtPark CodeForge Hackathon
- Hacrux Hackathon Excellence

HACKATHON

- **Redesign Hackathon — Top 4 Finalist**
  Out of 150 students, Round 1 Qualifier & Finalist (Top 4)
- **LNMIT Hackathon — Finalist**
  Round 1 Qualifier & Finalist
- **OceanLab X Charusat — Finalist**
  Round 1 Qualifier & Finalist
- **hack with Gujarat**
  Active Participant

EDUCATION

IRCTC Updation

- **Overview:** A modern UI/UX overhaul of the IRCTC interface featuring a premium Midnight & Azure theme and smooth interactions.
- Integrated Framer Motion for high-impact animations and polished transitions.
- Ensured a fully responsive, production-grade design for an enhanced booking experience.
- Optimized performance for faster load times and smoother navigation.

Technologies: React, Framer Motion, Tailwind CSS

Links: Live | Github | YouTube Demo

Trek Bikes Clone

- **Overview:** A sleek, immersive landing page for a premium e-bike brand that captures the high-end product experience.
- Focused on minimalist aesthetics and smooth Framer Motion animations to showcase products.
- Built fully responsive layouts with Tailwind CSS ensuring cross-device compatibility.
- Deployed on Netlify with fast load performance and a polished brand-aligned UI.

Technologies: React.js, Framer Motion, Tailwind CSS, Vite

ACHIEVEMENTS

- Maintained **8.34 CGPA** in B.E. Computer Engineering.
- Achieved **75% score** in Class 12th Higher Secondary.

Swaminarayan University
Bachelor of Engineering in CE
2023 - 2027
Result: 8.34 CGPA

MLSM Darbhanga
Class 12 (Science)
2021 - 2023
Result: 75% Score

- Selected as **Finalist** in LNMIT Hackathon among 500+ teams.
- **Finalist** in OceanLab X Charusat Hackathon.
- **Top 4 Finalist** in Redesign Hackathon at CodingGita.
